

1 Identification of the substance/mixture and of the company/undertaking· **Product identifier**· **Trade name:****Herculan PVA Chips 3 mm**· **Article number:**

HE_239993/13

· **Relevant identified uses of the substance or mixture and uses advised against**

No further relevant information available.

· **Application of the substance / the mixture**

Component or ready-mix for in-situ creation of flooring / roofing / adhesives / resins - materials.
The final product is created only upon curing - Chemical properties of the starting materials in section 3.

· **Details of the supplier of the safety data sheet**· **Manufacturer/Supplier:****HERCULAN B.V.**

c/o EPUTAN Kunststoftechniek B.V.

Energieweg 6

4231 DJ Meerkkerk

The Netherlands

Phone +31 183 354700

Fax: +31 183 354740

e-mail: info@herculan.com

· **Further information obtainable from:**

Environmental Department

· **Emergency telephone number:**

+49 (0) 6131 19240 [24 h - 365 d] - Giftinformationszentrale Mainz

or

+31 (0) 183 354 700 [Mo - Fr. 8 - 17 o'clock] - HERCULAN

2 Hazards identification· **Classification of the substance or mixture**

The product is not classified, according to the Globally Harmonised System (GHS).

· **Label elements**· **GHS label elements**

Void

· **Hazard pictograms**

Void

· **Signal word**

Void

· **Hazard statements**

Void

· **Other hazards**

-

· **Results of PBT and vPvB assessment**· **PBT:**

This product contains no substances assessed as PBT at concentrations of 0.1% or higher.

· **vPvB:**

This product contains no substances rated as vPvB at concentrations of 0.1% or higher.

3 Composition/information on ingredients· **Chemical characterisation: Mixtures**· **Description:**

Mixture / Resin consisting of the following components

· **Dangerous components:**

Void

· **SVHC**

-

· **Additional information:**

For the wording of the listed hazard phrases refer to section 16.

4 First aid measures· **Description of first aid measures**· **General information:**

No special measures required.

Take affected persons out into the fresh air.

(Contd. on page 2)

Trade name: **Herculan PVA Chips 3 mm**

(Contd. of page 1)

Do not leave affected persons unattended.

Seek medical treatment.

Medical supervision for at least 48 hours.

Show this safety data sheet to the doctor on duty.

Protection of first aiders: No action should be taken if there is a risk of personal accidents or in case of insufficient training. This can be dangerous for the person applying mouth-to-mouth resuscitation.

If the possibility of exposure exists, consult section 8 for specific personal protective equipment.

First-aiders should remember to protect themselves and wear the recommended protective clothing.

No action should be taken if there is a risk of personal accidents or in case of insufficient training.

· **After inhalation:**

In case of unconsciousness place patient stably in side position for transportation.

Seek medical treatment.

Use a respiratory bag or breathing device.

· **After skin contact:**

Seek medical treatment.

· **After eye contact:**

Protect unharmed eye.

As far as easy to do, remove any contact lenses.

· **After swallowing:**

Do not induce vomiting; call for medical help immediately.

A person vomiting while laying on their back should be turned onto their side.

Clean carefully or rinse mouth with water.

Keep breathing passages clear.

Never allow an unconscious person to drink (or eat).

Take patient to a hospital immediately.

· **Information for doctor:**· **Most important symptoms and effects, both acute and delayed**

No further relevant information available.

· **Indication of any immediate medical attention and special treatment needed**

No further relevant information available.

5 Firefighting measures· **Extinguishing media**· **Suitable extinguishing agents:**CO₂, powder or water spray. Fight larger fires with water spray or alcohol resistant foam.

Use fire extinguishing methods suitable to surrounding conditions.

· **Special hazards arising from the substance or mixture**

Formation of toxic gases is possible during heating or in case of fire.

Carbon monoxide (CO)

· **Advice for firefighters**· **Protective equipment:**

Wear self-contained respiratory protective device.

Do not inhale explosion gases or combustion gases.

Wear fully protective suit.

PSA 52 / PSA 55 / PSA 56 / PSA 57

· **Additional information**

Dispose of fire debris and contaminated fire fighting water in accordance with official regulations.

Collect contaminated fire fighting water separately. It must not enter the sewage system.

6 Accidental release measures· **Personal precautions, protective equipment and emergency procedures**

Remove persons from danger area.

Wear protective equipment. Keep unprotected persons away.

Keep people at a distance and stay on the windward side.

Wear protective clothing.

(Contd. on page 3)

Trade name: Herculan PVA Chips 3 mm

(Contd. of page 2)

- **Environmental precautions:** Inform respective authorities in case of seepage into water course or sewage system.
In case of seepage into the ground inform responsible authorities.
Prevent further leaks and spills if safe to do so. In case of significant leaks that cannot be contained, inform the local authorities.
If the product contaminates rivers, lakes or sewers, notify the respective authorities.
- **Methods and material for containment and cleaning up:** Let reaction take place at least 30 minuten.
Scoop up into lidded drums and render harmless.
Store in suitable and closed containers for disposal.
- **Reference to other sections** See Section 7 for information on safe handling.
See Section 8 for information on personal protection equipment.
See Section 13 for disposal information.

7 Handling and storage

- **Handling:** Use according to accepted rules and practices related to industrial hygiene and safety. After working with this product, wash face, hands and exposed skin thoroughly. Remove contaminated clothing and protective equipment before going to the canteen. Do not eat, drink or smoke during use. Do not allow contaminated work clothing to leave the workplace. Wash hands before each work break and immediately after using the product. Wash hands before each work break and at the end of the working day.
- **Precautions for safe handling** Provide eyewash facilities and safety showers close to the workplace.
- **Information about fire - and explosion protection:** No special measures required.
- **Conditions for safe storage, including any incompatibilities**
- **Storage:**
- **Requirements to be met by storerooms and receptacles:** No special requirements.
- **Information about storage in one common storage facility:** Store away from oxidising agents.
Store away from foodstuffs.
- **Further information about storage conditions:** Protect from frost.
Store in dry conditions.
Store in a cool place.
- **Specific end use(s)** No further relevant information available.

8 Exposure controls/personal protection

- **Additional information about design of technical facilities:** No further data; see section 7.
- **Control parameters**
- **Ingredients with limit values that require monitoring at the workplace:** The product does not contain any relevant quantities of materials with critical values that have to be monitored at the workplace.
- **Additional information:** The lists valid during the making were used as basis.
- **Exposure controls**
- **Personal protective equipment:**
- **General protective and hygienic measures:** Keep away from foodstuffs, beverages and feed.
Immediately remove all soiled and contaminated clothing
Store protective clothing separately.
Do not eat, drink, smoke or sniff while working.
- **Respiratory protection:**

Only during spraying without adequate removal by suction.

(Contd. on page 4)

Trade name: **Herculan PVA Chips 3 mm**

(Contd. of page 3)

Use suitable respiratory protective device in case of insufficient ventilation.

Use suitable respiratory protective device when high concentrations are present.

· Recommended filter device for short term use:

Air concentrations would be kept below exposure guidelines. When airborne concentrations may exceed exposure guidelines, use an approved air-purifying respirator fitted with a filter for organic vapours and particles. In circumstances where the concentration in the air may exceed the level for which an air-purifying respirator is effective, use a compressed air respirator (type: positive pressure) (air hose-fed or self-contained respirator). In emergencies or in conditions where the concentration in air is not known, use an approved compressed air breathing apparatus (type: positive pressure) or air hose-fed respirator (type: positive pressure). Use EC-approved respirator: Filter for organic vapours with a particulate pre-filter for highly toxic substances, type AP3 (must comply with Standard EN 14387).

· Protection of hands:

The glove material has to be impermeable and resistant to the product/ the substance/ the preparation.

· Material of gloves

The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.

· Penetration time of glove material

The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed.

The determined penetration times according to EN 16523-1:2015 are not performed under practical conditions. Therefore a maximum wearing time, which corresponds to 50% of the penetration time, is recommended.

· As protection from splashes gloves made of the following materials are suitable:

Nitrile rubber, NBR

Natural rubber, NR

· Not suitable are gloves made of the following materials:

Leather gloves

Strong material gloves

· Eye protection:

Tightly sealed goggles

· Body protection:

(Protective) work clothing

- Protective work clothing (long trousers, long-sleeved shirt). Avoid exposed skin, even in hot weather.

- Depending on processing: use spray-tight trousers or spray-tight overalls

Overall (preferably thick cotton) or Tyvek-Pro Tech 'C', TyvekPro Tech 'F' fully protective single-use clothing.

· Limitation and supervision of exposure into the environment

Storage of substances in tightly closed packaging

Emissions from ventilation or processing equipment should be monitored to ensure they meet the requirements of environmental protection legislation. In some cases, gas scrubbers, filters or technical modifications to process equipment are needed to reduce emissions to acceptable levels.

Avoid spreading spilled material and waste material and prevent it from coming into contact with soil, waterways, drains and sewers.

9 Physical and chemical properties**· Information on basic physical and chemical properties****· General Information****· Appearance:****Form:**

Solid

(Contd. on page 5)

WE4

Trade name: **Herculan PVA Chips 3 mm**

(Contd. of page 4)

Colour:	According to product specification
· Odour:	Characteristic
· Odour threshold:	Not determined
· pH-value:	Mixture is non-polar/aprotic.
· Change in condition	
Melting point/freezing point:	No test data available
Initial boiling point and boiling range:	Undetermined
· Flash point:	>100 °C
· Flammability	Not determined
· Decomposition temperature:	No test data available
· Ignition temperature:	Product is not selfigniting.
· Explosive properties:	Product does not present an explosion hazard. No test data available
· Explosion limits:	
Lower:	No test data available
Upper:	No test data available
· Vapour pressure:	Not applicable
· Density at 20 °C:	1 g/cm ³
· Relative density	>> density
· Vapour density	Not applicable
· Evaporation rate	Not applicable.
· Solubility in / Miscibility with water:	Insoluble.
· Partition coefficient: n-octanol/water:	No test data available
· Viscosity:	
Dynamic:	Not applicable
Kinematic:	Not applicable
· Other information	No further relevant information available.

* **10 Stability and reactivity**

· Reactivity	No further relevant information available.
· Chemical stability	Stable under recommended storage conditions. See Section 7, Storage.
· Thermal decomposition / conditions to be avoided:	Extreme temperatures and direct sunlight. Exposure to air or moisture for prolonged periods.
· Possibility of hazardous reactions	No dangerous reactions known.
· Conditions to avoid	No further relevant information available.
· Incompatible materials:	No further relevant information available.
· Hazardous decomposition products:	No dangerous decomposition products known.

* **11 Toxicological information**

· Information on toxicological effects	
· Acute toxicity	ATE values > 2000 mg/kg will have no impact on classification.
· LD/LC50 values relevant for classification:	

(Contd. on page 6)

Trade name: Herculan PVA Chips 3 mm

(Contd. of page 5)

· **Primary irritant effect:**

No irritant effect.

· **Skin corrosion/irritation**

No irritating effect.

· **Serious eye damage/irritation**

No sensitising effects known.

· **Respiratory or skin sensitisation**· **Additional toxicological information:**

The product is not subject to classification according to the calculation method of the General EU Classification Guidelines for Preparations as issued in the latest version.

When used and handled according to specifications, the product does not have any harmful effects to our experience and the information provided to us.

12 Ecological information· **Toxicity**· **Aquatic toxicity:**

No further relevant information available.

· **Persistence and degradability**

No further relevant information available.

· **Behaviour in environmental systems:**· **Bioaccumulative potential**

No further relevant information available.

· **Mobility in soil**

No further relevant information available.

· **Additional ecological information:**· **General notes:**

Not hazardous for water.

· **Results of PBT and vPvB assessment**

This substance/mixture does not contain any components that can be considered persistent, bioaccumulative and toxic (PBT) or very persistent and very bioaccumulative (vPvB) at levels of 0.1% or higher.

· **PBT:**

-

· **vPvB:**

-

· **Other adverse effects**

No further relevant information available.

13 Disposal considerations· **Waste treatment methods**· **Recommendation**

Smaller quantities can be disposed of with household waste.

This product, when disposed of in its unused and uncontaminated state, must be treated as hazardous waste according to EC Directive 2008/98/EC. Disposal practices must comply with all national and provincial laws and any municipal or local bylaws regarding hazardous waste. Additional evaluations may be required for used, contaminated and residual material. Do not discharge into sewers, soil or surface water. Incineration in a licensed incinerator suitable for this hazardous waste is recommended for this material. Small amounts of waste can be neutralized with e.g. polyol in preference to landfilling. Empty drums should be cleaned first (see Section 6) and then either punctured and scrapped or given to an approved reprocessor.

· **Uncleaned packaging:**· **Recommendation:**

Empty contaminated packagings thoroughly. They may be recycled after thorough and proper cleaning.

14 Transport information· **UN-Number**· **ADR, IMDG, IATA**

Void

· **UN proper shipping name**· **ADR, IMDG, IATA**

Void

· **Transport hazard class(es)**· **ADR, ADN, IMDG, IATA**· **Class**

Void

(Contd. on page 7)

Trade name: Herculan PVA Chips 3 mm

(Contd. of page 6)

· Packing group · ADR, IMDG, IATA	Void
· Environmental hazards:	Not applicable
· Special precautions for user	Not applicable
· Transport in bulk according to Annex II of Marpol and the IBC Code	Not applicable
· UN "Model Regulation":	Void

15 Regulatory information

- **Safety, health and environmental regulations/legislation specific for the substance or mixture**
- **Directive 2012/18/EU**
- **Named dangerous substances - ANNEX I** None of the ingredients is listed.
- **Seveso category** Specified in regulation: Not applicable
- **National regulations:**
- **Waterhazard class:** Generally not hazardous for water.
- **Other regulations, limitations and prohibitive regulations** General international information on combating damage caused by fire and leakage.
www.ERICARDS.net
- **Chemical safety assessment:** A Chemical Safety Assessment has not been carried out.

16 Other information

This information is based on our present knowledge. However, this shall not constitute a guarantee for any specific product features and shall not establish a legally valid contractual relationship.

- **Classification according to Regulation (EC) No 1272/2008** The classification of the mixture is based on the calculation method using substance data according to Regulation (EC) No 1272/2008.
The safety data sheet is prepared in accordance with Regulation (EC) No. 1907/2006 (REACH) § 31, taking into account Annex II, which was amended by Commission Regulation (EU) 2020/878.
- **Department issuing SDS:** Environmental Department
- **Contact:** Dr. Michael Kissel
- **Abbreviations and acronyms:**

ADR: Accord relatif au transport international des marchandises dangereuses par route (European Agreement Concerning the International Carriage of Dangerous Goods by Road)
IMDG: International Maritime Code for Dangerous Goods
IATA: International Air Transport Association
EINECS: European Inventory of Existing Commercial Chemical Substances
ELINCS: European List of Notified Chemical Substances
CAS: Chemical Abstracts Service (division of the American Chemical Society)
LC50: Lethal concentration, 50 percent
LD50: Lethal dose, 50 percent
PBT: Persistent, Bioaccumulative and Toxic
SVHC: Substances of Very High Concern
vPvB: very Persistent and very Bioaccumulative
TSCA: Toxic Substances Control Act
- *** Data compared to the previous version altered.**
